

Hello L^AT_EX!

Figure 1: Illusory contour image

$y = ax^2 + bx + c$ can be solved to get

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

The PDF of a normal distribution is

$$f(x|\mu,\sigma) = \frac{1}{\sigma\sqrt{2\pi}}e^{-\frac{(x-\mu)^2}{2\sigma^2}}$$
