@madsbrodt

Googling and StackOverflow'ing is a natural part of programming. Don't think of it as cheating. Knowing what to search for, and which results will fit your given situation is an important skill 🔥

100%, sometimes people don't realise that finding the solution or similar, that you can tweak to suit your needs & complete a given task is perfectly acceptable. You put it perfectly, knowing what to search for!

Agreed! When I first started I thought I needed to know everything and googling wasn't ok. My mentor at the time squashed that fear.

Learning to use search operators to refine your search is useful too

jaguar speed -car  
"tallest building"  
marathon OR race  
site:[youtube.com](https://www.youtube.com) or site:[dev.to](https://dev.to)

Google and StackOverFlow are just some tools we use as developers, it's like using React instead of plain Javascript
